

COMMDEC COMMHUB

The COMMDEC COMMHUB™ now supports Samsung OfficeServ 7000 Series PBX systems.

Samsung OfficeServ PBX Systems (7200 and 7400) are now supported by the COMMHUB system. The COMMHUB System provides interface support to PMS systems for this PBX to enable services for standard hospitality functions. PBX Interface via TCP/IP. PMS Interface (serial and TCP/IP) support via standard PMS interfaces to Hitachi/ComDial/Mitel and other similar systems assures compatibility with most PMS Systems. This configuration supports the Samsung SVMi card.

Samsung Features

- Housekeeping Status
- Check In/Out Name Updates
- Restriction Control
- Message Waiting Control
- Do Not Disturb Control
- Wakeup Support
- Voicemail Support
